1 Data base directions: the next steps
John L. Berg
November 1976 , Volume 8 , 8 Issue 4 , 2

Full text available: 🗎 pdf(9.95 MB)   Additional Information: full citation, abstract

What information about data base technology does a manager need to make prudent decisions about using this new technology? To provide this information the National Bureau of Standards and the Association for Computing Machinery established a workshop of approximately 80 experts in five major subject areas. The five subject areas were auditing, evolving technology, government regulations, standards, and user experience. Each area prepared a report contained in these proceedings. The proceedings p ...

2 Cluster-based scalable network services
Armando Fox, Steven D. Gribble, Yatin Chawathe, Eric A. Brewer, Paul Gauthier
October 1997 **ACM SIGOPS Operating Systems Review , Proceedings of the sixteenth ACM symposium on Operating systems principles**, Volume 31 Issue 5
Full text available: 🗎 pdf(2.42 MB)   Additional Information: full citation, references, citings, index terms

3 Fast detection of communication patterns in distributed executions
Thomas Kunz, Michiel F. H. Seuren
November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**
Full text available: 🗎 pdf(4.21 MB)   Additional Information: full citation, abstract, references, index terms

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

4 Model-driven development of Web applications: the AutoWeb system
Piero Fraternali, Paolo Paolini
October 2000 **ACM Transactions on Information Systems (TOIS)**, Volume 18 Issue 4
Full text available: pdf(6.94 MB)   Additional Information: full citation, abstract, references, citings, index terms

> This paper describes a methodology for the development of WWW applications and a tool
> environment specifically tailored for the methodology. The methodology and the
> development environment are based upon models and techniques already used in the
> hypermedia, information systems, and software engineering fields, adapted and blended in
> an original mix. The foundation of the proposal is the conceptual design of WWW
> applications, using HDM-lite, a notation for the specification of structure, nav ...
